

## VALUATION – JUNE 30, 2023

On October 20, 2023, the Board of Directors approved a valuation of \$107/share as the new price of the common stock of Iroquois Valley Farmland REIT, PBC effective November 1, 2023. The amount reflects a 6.5% increase from the former price of \$801/share (based on the December 31, 2022 valuation, prior to the 8:1 stock split) and an 16.8% increase from \$730, the price on June 30, 2022 (also prior to the 8:1 stock split approved in September 2023).

This new share price reflects the Iroquois Valley Farmland REIT, PBC valuation as of June 30, 2023. All current shareholders' total stock value now equals the number of shares they own multiplied by this updated share price.

The methodology used to determine this share price is consistent with our historical practice. Here is a synopsis for your review:

- The Company obtains the equity value as reported in June 30, 2023 financial statements. This is reflected in the “Book / Cost Basis” column in the table below. We do not believe this represents the market value of our assets and do further analysis to obtain a representative market value.
- For our owned real estate, our starting point for market value is independent third-party appraisals and valuations.
- Given that we believe organic farmland is undervalued in most standard appraisals and comparable analyses, we add an incremental value of 5% for farms that are certified organic.
- We believe the book value of the mortgages represents the current market value given our fixed-rate terms are limited in duration and most loans have floating rate mechanics after the initial fixed period. Additionally, we have included loss reserves in the book value as reported in our financials to capture principal repayment risks.
- After compiling a market asset value, our board also added a 10% operating company premium. The premium is based, among many things, on:
  - the diversification value of a corporate portfolio,
  - our track record of selecting farmland tenants,
  - the business relationships that we have developed with generations of farmers, farmer associations, and farmer cooperatives,
  - our growth potential,
  - our history of innovation in conservation finance and the impact investing space,
  - our scalability as a decentralized entity in the high growth organic market, and
  - the future earnings potential and economic efficiencies of our REIT structure.

The table below outlines various steps and figures associated with our board-approved valuation of \$107 per share for this offering (fully diluted). The figures in the table are as of the June 30, 2023 valuation and the December 31, 2022 valuation.

**Notes:**

(1) The Organic Premium is captured on an individual property basis within these values.

(2) Book basis net of allowances for loan losses and reflects estimated market value. Includes lines of credit.

(3) Diluted share count reflects the effects of option dilution on the value per share calculation and includes those shares issued to non-employee Directors that are still unvested under the terms of the Company's Board Compensation Policy dated June 3, 2022.

(4) Reflects a 10% premium applied to the equity value.

(5) Equals Equity Value plus Operating Company Premium.

**Important Note Regarding this Determination of Share Price**

Please note that our Board of Directors has determined the share price on the basis outlined herein. This price, while based on management's best estimate of the market value of our assets, and consistent with our recent valuation practices, may not bear any relationship to what our assets or shares would sell for in an open market or in the event of a liquidation. There is generally no public market for our shares. Because the share price is not

based upon any public market valuation, the price may be different than the proceeds that you would receive upon liquidation or a resale of your shares if they were to be listed on an exchange or actively traded by broker-dealers.

#### Our Use of this Share Valuation

The recently approved share price is also used for our Dividend Reinvestment Program (the “DRIP”) and to determine the repurchase price of shares under our Stock Redemption Program, at such time that the Company offers to redeem shares under that program.
